Praxair Surface Technologies is a company that specializes in surface coatings, and produces powders, and coating equipment.

Being masters in coating solutions, a special development named NOAH was specially studied against the Ink Spitting.

NOAH was developed based on operating environments and combines:

- Material science engineering
- Advanced coating technology
- Post-coating operations
- Highly reduced surface tension with optimal hydrophilic coating performance

NOAH

Tests conducted on various printing machines have led to:

- Excellent stability on the open inking system and on chambered inking systems.
- Great resistance against minor mechanical misalignments of inking systems.
- Praxair's NOAH coating can be engraved with various types of engraving, including PROLINE®, NOVALINE™, and ART™ Gold.
- Possibility to reach higher printing speed with different types of inks.
